

SERVICES INCLUDE:

- Land Use Planning
- Master Site Planning
- Concept Creation
- Content Creation
- Presentation Media

Master Planning and Concept Creation are crucial steps in the early stages of every entertainment design project. During this phase, ITEC's expert creative team establishes the design direction, the look, and the feel of the project. We work closely with our clients to explore the development potentials for the site as we identify the themes that will define the guest experience.
